

One platform

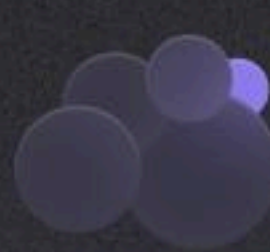

# Automating finance operations.

Globally Connected

Effortlessly fast

Finofo lets you seamlessly manage real-time accounts payable, approvals, receivables, corporate cards, treasury, and currency conversion—all from one powerful platform, in seconds.

## Finofo features

### Fully custom internal controls for complete auditability

Build complex, **fully customized internal control policies** to meet strict compliance standards like SOX, with a complete audit trail of all transactions ever entered in the system.

### Easily review and approve large batch payments

**Create and send large batch payments for approval**, fully aligned with your organization's customized approval policies, ensuring efficient and streamlined payment processes.

### Simplified review process for complex transactions

Easily access and review all necessary details for even the most complex batches, including total conversions, payments, bills, vendors, and approval history—**making review faster and more transparent**.

### Seamless bill and vendor approval workflows

**Expand approval workflows** to include bills and vendors with automated ERP bill imports and bulk upload capabilities for faster processing.

### Complete visibility across approval history

Retain and **view a full history of all approvals, edits, and changes** for bills and vendors, allowing you to use the system as a lightweight ERP for accounts payable management.

### Agile, multi-entity, centralized treasury

Manage corporate operating cash for all **US and Canada entities from one platform** with 24/7, real-time inter-company transfers in any currency.

### Instant global receivables

Remove barriers, **get paid faster**, and boost your bottom line when you offer your customers a simple, convenient way to pay.

### Fully automated accounts payable

Effortlessly integrate your ERP with supplier accounts for **real-time, automated payments**—slashing fees, speeding up your global transactions, and igniting efficiency.

### Powerful, customizable security and governance

**Enterprise-leading security and privacy frameworks**, including SOC 2 certified partners and authentication, SSO login, MFA, 256-bit encryption and more—while also enabling you to design your own fully-custom compliance program.

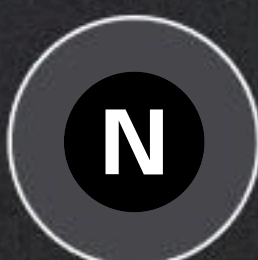

### Transaction reconciliation in seconds

Flawless **ERP and data synchronicity and integration** for speed-of-now transaction matching and reconciliation.

## Finofo power your business' way

Whether you're growing across the country or around the globe, Finofo powers every transaction transparently, accurately, and immediately. Explore the Finofo platform and feature benefits across a suite of both pay-as-you-go and subscription based pricing options and choose the model that makes the most sense for powering your business today.

## Instant, seamless integrations

Let's get moving
